Subject: Preparing for LVX System's Next Phase of Development

Dear LVX Stockholders and Noteholders,

As the recently elected board chairman of LVX System, it is a pleasure to greet you as we prepare for this next phase of development in launching Visible Light Communication (VLC) to the broad marketplace. My background in building successful businesses offers a unique perspective in strategic planning that aligns well with the operations and systems needed to maximize the impact of LVX technologies.

Over the past six months, I've been fortunate to work alongside Felicity-John and the LVX team. That experience has given me great confidence in the team's ability to effectively monetize LVX System's patented technologies.

My 40 years of business experience, working with professionals in legal, accounting, real estate and investment banking, affords me the wisdom and experience to work alongside the LVX management professionals, to develop sustainable VLC solutions. My experience in the solar industry is very relevant to the untapped potential available with LVX today and in the coming years.

As we enter this next phase for LVX we encourage you to participate and/or make introductions to individuals and firms you may feel worthy. Together, we can all achieve more, and partnerships on multiple fronts are essential to our long-term success.

Please let me know if you have input or questions.

Best regards,

Al Nagy
Board Chairman, LVX System
